Professional Summary

Computer Science professional with experience across identity and access management, privileged access management, enterprise application development, UAT coordination, data analytics, automation, and AI-driven technologies. Hands-on experience with CyberArk PAM, Power BI, Java, Spring Boot, Angular, REST APIs, SQL, and enterprise technology environments. Skilled in collaborating across technical and business teams to improve security, testing, reporting, and operational processes.

Technical Skills

Identity & Security	IAM, PAM, CyberArk ISPSS / Privileged Cloud, Access Governance, Privileged Account Management
Programming	Java, Python, PowerShell, SQL, TypeScript, JavaScript
Development	Spring Boot, Angular, REST APIs, Microservices, JPA/Hibernate
Data & Reporting	Power BI, Excel, Data Analytics, Reporting, Data Validation
Cloud & Tools	AWS, Git, GitHub, Jira, Postman, Jenkins, Maven, ALM / OpenText ELM
Databases	PostgreSQL, Oracle, MySQL, DynamoDB

Professional Experience

McCain Foods Limited	Florenceville-Bristol, NB
UAT Coordination – Data & Reporting	Jun 2026 – Aug 2026

- Coordinate UAT activities and reporting across enterprise transformation initiatives involving SAP S/4HANA and Power BI.
- Track test execution, defects, RCA completion, blocked and failed test cases, and supporting evidence across multiple regions and business towers.
- Developed consolidated Power BI reporting to improve visibility into audit observations, testing progress, and outstanding actions.
- Collaborate with test coordinators, report owners, business stakeholders, and leadership to identify risks, resolve gaps, and support stage-gate readiness.

Identity & Access Management Intern	May 2025 – Dec 2025
--	---------------------

- Supported CyberArk Privileged Access Management operations including privileged account onboarding, offboarding, validation, and inactivity reviews.
- Reviewed privileged users and accounts for inactivity and policy compliance, coordinating remediation with account owners and stakeholders.
- Supported monthly privileged-group validation and access governance activities using Excel, Power BI, and Microsoft Access.
- Delivered CyberArk training and knowledge-sharing sessions covering privileged access concepts, account management, and security practices.

Tata Consultancy Services	Chennai, India
System Engineer / Software Engineer	Mar 2021 – Nov 2023

- Developed and maintained enterprise web applications using Java, Spring Boot, AngularJS, REST APIs, and relational databases.
- Built and integrated backend services with Oracle databases using JPA/Hibernate, SQL, and enterprise application frameworks.
- Supported debugging, application maintenance, performance improvements, defect resolution, and feature enhancements across frontend and backend components.
- Collaborated with cross-functional Agile teams to deliver scalable, secure, and maintainable enterprise software solutions.

Selected Projects

Radsan Revamp – Full-Stack Application

Ongoing

Spring Boot, PostgreSQL, Angular

- Modernizing an existing application using a Spring Boot backend, PostgreSQL database, and Angular frontend.

Smart Inventory Management System

Jan 2026 – Mar 2026

Angular, FastAPI, AWS SageMaker, Amazon S3, DynamoDB, REST APIs, RBAC

- Developed a cloud-enabled inventory platform with role-based access, stock monitoring, search, dashboard analytics, and API-driven data integration.

Education

University of New Brunswick

Fredericton, NB

Master of Computer Science

2024 – 2026

Certifications & Training

AWS Cloud Quest: Cloud Practitioner | AWS Educate Introduction to Generative AI | AWS Educate Machine Learning Foundations
